Refund Policy

1. Overview

Refunds are issued according to the reason for the return and the condition of the returned product.

2. When a Refund Is Available

A customer may be eligible for a refund when:

- The product is defective.
- The wrong product was delivered.
- The product was damaged during shipping.
- An eligible return is approved.
- An order is cancelled before shipment.

3. Refund Process

After a returned product reaches the company, it may be inspected by the returns team.

If the return is approved, the refund is initiated using the original payment method whenever possible.

4. Refund Processing Time

Refunds are normally initiated within 5–7 business days after return approval.

The time required for the refund to appear in the customer's bank account or card account depends on the payment provider.

5. Cancelled Orders

If an order is cancelled before shipment and payment has already been collected, the customer is eligible for a refund according to the applicable payment method.

6. Partial Refunds

A partial refund may be issued when only part of an order is returned or when a product has a minor issue and the customer agrees to keep it.

7. Refund for Damaged Products

Customers who receive damaged products should contact customer support within 7 days of delivery.

Photos or videos may be requested to verify the condition of the product.

8. Failed Refunds

If a refund does not appear within the expected timeframe, the customer should contact support with the order number and refund reference number.

The support team can verify the refund status with the payment provider.

9. Important Information

Refund eligibility is determined after reviewing the order, return reason, product condition, and applicable company policies.
