Shipping Policy

1. Overview

Orders are processed after payment has been successfully confirmed. Processing time may vary depending on product availability and order volume.

2. Order Processing

Standard orders are generally processed within 1–2 business days.

Orders containing products that are temporarily unavailable may require additional processing time.

3. Delivery Time

Standard delivery generally takes 3–7 business days after the order has been shipped.

Delivery times may vary depending on the customer's location, courier availability, weather, holidays, and other circumstances.

4. Shipping Charges

Shipping charges are calculated based on factors such as delivery location, package size, weight, and selected shipping method.

The applicable shipping charge is displayed before the customer completes the order.

5. Tracking

After an order has been shipped, the customer receives a tracking number when tracking is available.

Customers can use the tracking number to check the current delivery status.

6. Delayed Deliveries

If an order has not arrived within the expected delivery period, customers should first check the tracking information.

If there is no useful tracking update, the customer can contact customer support.

7. Incorrect Address

Customers are responsible for providing a correct and complete delivery address.

If an order has not yet shipped, support may be able to update the address.

Once an order has been shipped, an address change may not be possible.

8. Failed Delivery

If a courier cannot deliver an order, the courier may attempt delivery again or return the package to the company.

Customers should contact support if their order is returned because of a delivery issue.

9. International Shipping

International delivery availability depends on the destination country and the products included in the order.

Additional customs duties, taxes, or import charges may apply to international orders.
